PROFILE

AI Engineering graduate with distinction who builds dependable data pipelines, Python services, and cloud-ready applications. Experienced in turning raw and inconsistent inputs into validated structured data, designing backend and persistence layers, and automating delivery with containers and CI/CD. Brings a practical engineering mindset and enjoys translating operational problems into maintainable technical solutions.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python data pipeline that processes echocardiographic DICOM studies, extracts measurements with OCR and image processing, and exports structured JSON.
- Designed resumable batch processing, validation queues, review tooling, logging, and traceable outputs for large clinical datasets.
- Optimised a metadata-guided OpenCV matching workflow from roughly 21 hours to 23 minutes on one representative run.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Built a paid local-first application with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Translated real operator requirements into imports, exports, data validation, realtime synchronisation, replication, monitoring, and resilient failover.

SELECTED PROJECTS

Azure ML Lifecycle

Built reusable pipeline components for data preparation, splitting, cloud training and registration, then packaged serving with FastAPI, Docker, Kubernetes, MLflow, and CI/CD.

Financial AI Agent

Owned backend architecture, PostgreSQL persistence, retrieval, FastAPI services, containers, tests, and most frontend integration in a six-service application.

AWS Fargate Infrastructure with Vault

Designed and tested Terraform modules for secure private workloads, IAM-based secret delivery, observability, autoscaling, health checks, and deployment safeguards.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · data engineering, Azure ML, MLflow, Docker, Kubernetes, CI/CD and APIs

SKILLS

DATA ENGINEERING

Python · SQL/PostgreSQL
· Data pipelines ·
Validation · NumPy ·
pandas

BACKEND

FastAPI · REST APIs ·
SQLite · C#/.NET ·
TypeScript/React

CLOUD & DELIVERY

Azure ML · AWS · Docker ·
Kubernetes · GitHub
Actions · Terraform

ENGINEERING PRACTICE

Git · Testing · CI/CD ·
Documentation ·
Requirements analysis ·
Agile

LANGUAGES

Dutch (native) · English
(C1) · French (B1–B2)

Driving licence B · Hospitality
work since 2021
