PROFILE

AI Engineering graduate with distinction who builds agentic applications, data pipelines, and reliable Python services. Hands-on experience spans RAG, MCP tool execution, PostgreSQL, vector retrieval, model evaluation, cloud ML workflows, and containerised delivery. Enjoys turning messy data and ambiguous requirements into systems that are useful, testable, and ready to run.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python data pipeline that processes echocardiographic DICOM studies, extracts measurements with OCR and computer vision, and exports structured JSON.
- Designed resumable batches, validation queues, review tooling, structured logging, and traceable outputs for large collections of clinical data.
- Combined metadata and OpenCV ECC alignment to reduce one representative source-video matching run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Built a local-first platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO for live event operations.
- Implemented imports, exports, realtime data synchronisation, LAN discovery, replication, monitoring, and failover under unreliable network conditions.

SELECTED PROJECTS

Financial AI Agent

Built the backend and orchestration for a six-service application with FastAPI, seven typed MCP tools, RAG, PostgreSQL, ChromaDB, local LLMs, citations, tests, and guardrails.

Azure ML Lifecycle

Created reusable cloud pipeline components for data preparation, training and registration, then packaged serving with MLflow, FastAPI, Docker, Kubernetes, and CI/CD.

AWS Fargate Infrastructure with Vault

Designed tested Terraform infrastructure for private ECS workloads with IAM-based Vault authentication, observability, autoscaling, health checks, and deployment safeguards.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · data pipelines, Azure ML, MLflow, Docker, Kubernetes, CI/CD and GenAI

SKILLS

AI & AGENTS

RAG · MCP · Tool calling · Agent workflows · Embeddings · Model evaluation

DATA & BACKEND

Python · FastAPI · SQL/PostgreSQL · ChromaDB · NumPy · pandas

CLOUD & LLMOps

Azure ML · MLflow · Docker · Kubernetes · GitHub Actions · Terraform

ADDITIONAL

TypeScript/React · REST APIs · Git · Linux · Testing · Documentation

LANGUAGES

Dutch (native) · English (C1) · French (B1–B2)

Driving licence B · Hospitality work since 2021
