PROFILE

AI Engineering graduate with distinction who thinks in complete systems rather than isolated features. Has taken products from ambiguous requirements to working software across backend, frontend, data, infrastructure, realtime synchronisation, and applied AI. Works pragmatically, documents trade-offs, and enjoys owning technical problems from first design to reliable delivery.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Turned an open-ended medical research question into a usable Python product with DICOM processing, computer vision, OCR, structured output, and GUI review tooling.
- Designed resumable workflows, validation queues, logging, and cross-platform handoff documentation with reliability and future maintenance in mind.
- Reduced one representative source-video matching run from roughly 21 hours to 23 minutes through metadata-guided OpenCV alignment.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Designed and delivered a paid local-first operations product with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Owned system-level concerns including operator UX, API boundaries, LAN discovery, realtime synchronisation, replication, health visibility, and failover.

SELECTED PROJECTS

AWS Fargate Infrastructure with Vault

Designed reusable Terraform infrastructure with private services, identity-based secret delivery, observability, health checks, autoscaling, and rollback safeguards.

Financial AI Agent

Owned the backend architecture and most integration work for a six-service React and FastAPI application with RAG, MCP tools, PostgreSQL, containers, and tests.

Athas Code Editor · Open-Source Maintainer

Contributes across React/TypeScript and Tauri/Rust, resolving product, platform, networking, and resource-management problems in a real open-source codebase.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · architecture,
backend, frontend, cloud,
automation and applied AI

SKILLS

PRODUCT ENGINEERING

TypeScript · React ·
Python · FastAPI ·
Express · C#/.NET

SYSTEMS & DATA

REST APIs · tRPC ·
PostgreSQL · SQLite ·
Realtime sync ·
Integrations

CLOUD & AUTOMATION

AWS · Azure ML · Docker ·
Kubernetes · GitHub
Actions · Terraform

APPLIED AI

RAG · MCP · Agent
workflows · Computer
vision · Model evaluation

LANGUAGES

Dutch (native) · English
(C1) · French (B1–B2)

Driving licence B · Hospitality
work since 2021
