PROFILE

AI Engineering graduate with distinction and hands-on experience in computer vision, OCR, RAG, agentic systems, classical machine learning, and edge AI. Builds the software around AI as well: Python pipelines, APIs, validation workflows, databases, tests, containers, and cloud deployment. Especially motivated by operational AI that turns sensor and system data into reliable decisions in autonomous and maritime environments.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python application that turns echocardiographic DICOM studies into structured research data using computer vision, OCR, and review tooling.
- Designed resumable processing, validation queues, traceable outputs, and cross-platform documentation so the workflow could be used and extended reliably.
- Reduced one representative OpenCV and metadata-based source-video matching run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Engineered a paid local-first operations platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Designed operator-focused workflows, realtime synchronisation, automatic LAN discovery, replicated failover, health checks, and reliable offline operation.

SELECTED PROJECTS

Financial AI Agent

Owned the FastAPI backend, multi-step orchestration, seven typed MCP tools, RAG, PostgreSQL, ChromaDB, containers, tests, citations, and confirmation guardrails in a six-service application.

Offline Semi-Supervised AI in Rust

Built and evaluated a Burn/Rust plant-disease classifier that reached 94.90% held-out accuracy and shipped as an approximately 26 MB offline application tested on iPhone.

Azure ML Lifecycle

Built reusable cloud pipeline components and packaged a FastAPI model service with Azure ML, MLflow, Docker, Kubernetes manifests, health checks, and GitHub Actions.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · computer vision,
deep learning, GenAI,
reinforcement learning, edge AI,
and model evaluation

SKILLS

AI ENGINEERING

Python · Computer vision ·
OCR · RAG · MCP ·
Agentic systems

ML & DATA

PyTorch · Burn · NumPy ·
pandas · PostgreSQL ·
ChromaDB

MLOPS & CLOUD

Azure ML · MLflow ·
Docker · Kubernetes ·
GitHub Actions · FastAPI

SOFTWARE ENGINEERING

TypeScript/React · Rust ·
C#.NET · REST APIs ·
Linux · Testing

LANGUAGES

Dutch (native) · English
(C1) · French (B1–B2)

Driving licence B · Hospitality
work since 2021
