PROFILE

AI Engineering graduate with distinction and hands-on experience taking computer vision, RAG, agentic, and classical ML systems beyond prototypes. Builds production-minded Python and FastAPI backends with Docker, evaluation, persistence, tests, and cloud ML workflows. Brings a strong public portfolio, open-source contributions, and a focus on reliable AI that creates measurable value.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built an end-to-end Python pipeline for echocardiographic DICOM studies using computer vision, OCR, structured data extraction, and review tooling.
- Designed resumable processing, validation queues, traceable outputs, and cross-platform documentation so the research workflow could be used and extended reliably.
- Optimised an OpenCV ECC and metadata-based source-video matcher from roughly 21 hours to 23 minutes on one representative run.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Engineered a production-used local-first platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Designed realtime synchronisation, automatic LAN discovery, replicated hot-standby failover, health checks, and operator-safe workflows for unreliable event conditions.

SELECTED PROJECTS

Financial AI Agent

Owned the FastAPI backend, multi-step orchestration, seven typed MCP tools, RAG, PostgreSQL, ChromaDB, containers, tests, citations, and confirmation guardrails in a six-service application.

Offline Semi-Supervised AI in Rust

Built and evaluated a Burn/Rust classifier that reached 94.90% held-out accuracy and shipped as an approximately 26 MB offline application tested on iPhone.

Azure ML Lifecycle

Implemented data preparation, cloud training, model registration, MLflow tracking, FastAPI serving, Docker, Kubernetes manifests, and GitHub Actions.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · Azure ML,
MLflow, Docker, Kubernetes, CI/
CD and model evaluation

SKILLS

AI ENGINEERING

Python · OpenCV · RAG ·
MCP · Agentic systems ·
OCR · Model evaluation

BACKEND & DATA

FastAPI · PostgreSQL ·
SQL · REST APIs · NumPy
· pandas · ChromaDB

MLOPS & CLOUD

Azure ML · MLflow ·
Docker · GitHub Actions ·
Kubernetes · Terraform

ADDITIONAL

TypeScript/React · Rust/
Burn · C#/ .NET · Git ·
Linux · Testing

LANGUAGES

Dutch (native) · English
(C1) · French (B1–B2)

Driving licence B · Hospitality
work since 2021
