PROFILE

AI Engineering graduate with distinction who combines applied AI with dependable software delivery. Hands-on experience spans computer vision, OCR, GenAI, RAG, agentic systems, model evaluation, Python APIs, data pipelines, MLOps, and cloud deployment. Enjoys turning open-ended problems into practical solutions, communicating technical choices clearly, and building AI that is reliable and useful in real environments.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built an end-to-end Python pipeline that transforms echocardiographic DICOM studies into structured research data using computer vision, OCR, and review tooling.
- Designed resumable batch processing, validation queues, traceable outputs, structured logging, and cross-platform documentation for a workflow used with real clinical imaging data.
- Reduced one representative OpenCV and metadata-based source-video matching run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Engineered a paid client platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO for the operation of 24-hour running events.
- Translated operational needs into clear workflows, realtime synchronisation, automatic LAN discovery, replicated failover, health checks, and reliable offline operation.

SELECTED PROJECTS

Financial AI Agent

Owned the FastAPI backend, multi-step orchestration, seven typed MCP tools, RAG, PostgreSQL, ChromaDB, containers, tests, citations, and confirmation guardrails in a six-service application.

Azure ML Lifecycle

Implemented data preparation, cloud training, model registration, MLflow tracking, FastAPI serving, Docker, Kubernetes manifests, health checks, and GitHub Actions.

Offline Semi-Supervised AI in Rust

Built and evaluated a Burn/Rust plant-disease classifier that reached 94.90% held-out accuracy and shipped as an approximately 26 MB offline application tested on iPhone.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · computer vision, deep learning, GenAI, reinforcement learning, edge AI, and model evaluation

SKILLS

AI & MACHINE LEARNING

Python · PyTorch · OpenCV · OCR · RAG · MCP · Model evaluation

MLOPS & CLOUD

Azure ML · MLflow · Docker · Kubernetes · GitHub Actions · FastAPI

DATA & BACKEND

PostgreSQL · SQL · NumPy · pandas · ChromaDB · REST APIs

SOFTWARE DELIVERY

Client delivery · Technical documentation · Testing · Git · Linux

LANGUAGES

Dutch (native) · English (C1) · French (B1–B2)

Driving licence B · Hospitality work since 2021
