## PROFILE

AI Engineering graduate with distinction who combines software engineering with first-hand experience in medical imaging research. Builds dependable backend, data, and full-stack systems with attention to clean code, validation, practical users, and long-term maintainability. Motivated to apply this foundation to healthcare software that supports clinicians and patients beyond a research prototype.

## TECHNICAL EXPERIENCE

### AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python pipeline for echocardiographic DICOM studies that extracts clinical measurements with OCR and image processing and exports structured data.
- Designed resumable batches, validation queues, review tooling, ECG trace extraction, and clear handoff documentation for a medical research workflow.
- Developed an OpenCV and DICOM metadata-based source-video matcher, reducing one representative run from roughly 21 hours to 23 minutes.

### Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Built a real-world operations platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Translated operator needs into reliable workflows, imports and exports, realtime synchronisation, LAN discovery, health visibility, and safe failover behaviour.

## SELECTED PROJECTS

### Event Chatbot for XPO Group

Contributed to a full-stack RAG system for an external client using Azure OpenAI, Cosmos DB, .NET, Next.js, and Python ingestion.

### Financial AI Agent

Owned backend architecture, FastAPI services, persistence, containers, tests, and most frontend integration across a six-service application.

### Athas Code Editor · Open-Source Maintainer

Merged C# support and reliability fixes across a React/TypeScript and Tauri/ Rust codebase, including memory leaks and an LSP race condition.

## EDUCATION

### Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track ·  
Howest

Sep 2023–Jun 2026

### Graduated with distinction

MLOps 18/20 · software  
architecture, testing, Azure,  
Docker, APIs and data  
engineering

## SKILLS

### SOFTWARE

C#/ .NET · TypeScript/  
React · Python · FastAPI ·  
REST APIs

### DATA & HEALTHCARE

SQL/PostgreSQL · DICOM  
· Computer vision · OCR ·  
Validation workflows

### CLOUD & DELIVERY

Azure ML · Docker ·  
GitHub Actions · CI/CD ·  
Testing · Git

### ADDITIONAL

SQLite · Electron · Tauri/  
Rust · Agile teamwork ·  
Technical documentation

## LANGUAGES

Dutch (native) · English  
(C1) · French (B1–B2)

Driving licence B · Hospitality  
work since 2021
