PROFILE

AI Engineering graduate with distinction who builds dependable Python backends, agent workflows, applied AI systems, and cloud-ready applications. Combines hands-on delivery across APIs, automation, data, and full-stack software with a pragmatic approach to testing and reliability. Ready to grow into an AI-native engineer who can connect technology to concrete business problems.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python pipeline that reads echocardiographic DICOM studies, detects measurement regions, extracts values with OCR and image processing, and exports structured JSON.
- Turned an open-ended research problem into resumable batch processing, validation queues, review tooling, structured logging, and a documented cross-platform handoff.
- Optimised a source-video matcher with OpenCV ECC alignment and DICOM metadata, reducing one representative run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollon 24-Hour Run System · Belgium

- Built a local-first operations platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO for a real 24-hour running event.
- Implemented operator workflows, API integration, LAN discovery, realtime synchronisation, health visibility, and replicated hot-standby failover.

SELECTED PROJECTS

Financial AI Agent

Owned backend architecture and agent orchestration across a six-service application using FastAPI, MCP tools, RAG, PostgreSQL, ChromaDB, local LLMs, containers, tests, and guardrails.

Azure ML Lifecycle

Built reusable Azure ML pipeline components and packaged a FastAPI model service with Docker, Kubernetes manifests, MLflow, health checks, and GitHub Actions.

Athas Code Editor · Open-Source Maintainer

Merged fixes and features across React/TypeScript and Tauri/Rust, including C# support, Linux UI work, proxy handling, memory leaks, and an LSP race condition.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · Azure ML, MLflow, Docker, Kubernetes, CI/CD, GenAI and backend engineering

SKILLS

SOFTWARE ENGINEERING

Python · FastAPI · TypeScript/React · C#/.NET · SQL/PostgreSQL

AI & AUTOMATION

RAG · MCP · Tool calling · Agent workflows · Model evaluation · Computer vision

CLOUD & PLATFORM

Azure ML · Docker · Kubernetes · GitHub Actions · REST APIs · Linux

ENGINEERING PRACTICE

Git · Testing · CI/CD · Agile teamwork · Documentation · System integration

LANGUAGES

Dutch (native) · English (C1) · French (B1–B2)

Driving licence B · Hospitality work since 2021
