PROFILE

AI Engineering graduate with distinction who builds dependable Python backends, agent infrastructure, applied AI systems, and data pipelines. Experienced in taking unfamiliar problems from raw data to validated software, cloud ML workflows, APIs, and deployable applications. Looking for a junior backend, applied AI, or MLOps role where I can contribute and grow with experienced engineers.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python pipeline that reads echocardiographic DICOM studies, detects burned-in measurement regions, extracts values with OCR and image processing, and exports structured JSON.
- Designed resumable batch processing, validation queues, review tooling, ECG trace extraction, and cross-platform handoff documentation.
- Developed a source-video matcher with OpenCV ECC alignment and DICOM metadata, reducing one representative run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Built a local-first race operations platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO.
- Implemented operator workflows, live displays, imports and exports, automatic LAN discovery, realtime synchronisation, and replicated hot-standby failover for unreliable event conditions.

SELECTED PROJECTS

Offline Semi-Supervised AI in Rust

Built an end-to-end Burn/Rust plant-disease classifier. The saved SSL checkpoint reached 94.90% held-out top-1 accuracy; packaged weights were about 916 KB and the offline application about 26 MB, with inference tested on an iPhone 12.

Financial AI Agent

In a two-person academic project, owned backend architecture, orchestration, MCP integration, persistence, containers, tests, and most frontend integration across a six-service application.

Athas Code Editor · Open-Source Maintainer

Merged contributions across React/TypeScript and Tauri/Rust: C# support, image diffing, Linux UI, proxy handling, resource and memory leaks, and an LSP race-condition fix.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · Azure ML pipelines, MLflow, Docker, Kubernetes & CI/CD

SKILLS

PRIMARY

Python · FastAPI · OpenCV · SQL/PostgreSQL · Git · Linux

AI & DATA

Computer vision · OCR · RAG · MCP · Model evaluation · NumPy · pandas

CLOUD & PLATFORM

Azure ML · MLflow · Docker · GitHub Actions · REST APIs · Testing

ADDITIONAL

C#/ .NET · TypeScript/React · Rust/Burn · Tauri

LANGUAGES

Dutch (native) · English (C1) · French (B1–B2)

ADDITIONAL

Driving licence B
Hospitality work since 2021 in fast-paced customer-facing teams
