PROFILE

AI Engineering graduate with distinction and hands-on experience building software for medical imaging research. Combines Python, DICOM, image processing, and machine learning with full-stack development in TypeScript, React, C#/.NET, APIs, and databases. Works carefully around validation, testing, traceability, technical documentation, and the needs of people using the software.

TECHNICAL EXPERIENCE

AI & Software Engineering Intern

Feb–Jun 2026

2Ai IPCA · Barcelos, Portugal

- Built a Python pipeline for echocardiographic DICOM studies that extracts clinical measurements with OCR and image processing and exports structured research data.
- Designed resumable batches, validation queues, human review tooling, ECG trace extraction, traceable outputs, and cross-platform handoff documentation.
- Developed a source-video matcher using DICOM metadata and OpenCV ECC alignment, reducing one representative run from roughly 21 hours to 23 minutes.

Software Engineer · Paid Client Project

2026

Apollooon 24-Hour Run System · Belgium

- Built a paid full-stack operations platform with React, TypeScript, Express, Electron, SQLite, tRPC, and Socket.IO for a real 24-hour event.
- Translated operator requirements into tested workflows, imports and exports, realtime synchronisation, network discovery, monitoring, and safe failover behaviour.

SELECTED PROJECTS

Event Chatbot for XPO Group

Contributed to a full-stack RAG application for an external client using Azure OpenAI, Cosmos DB, .NET, Next.js, and Python ingestion.

Azure ML Lifecycle

Built cloud data preparation, TensorFlow training, model registration, MLflow tracking, FastAPI serving, Docker, Kubernetes manifests, and GitHub Actions.

Athas Code Editor · Open-Source Maintainer

Merged C# support and reliability fixes across a React/TypeScript and Tauri/ Rust codebase, including memory leaks and an LSP race condition.

EDUCATION

Professional Bachelor in Multimedia & Creative Technologies

AI Engineering track · Howest

Sep 2023–Jun 2026

Graduated with distinction

MLOps 18/20 · computer vision, deep learning, software architecture, testing, Azure, Docker, APIs, and data engineering

SKILLS

FULL-STACK DEVELOPMENT

TypeScript/React · C#/.NET · Python · FastAPI · REST APIs · SQL

MEDICAL IMAGING

DICOM · OpenCV · OCR · Image alignment · ECG traces · Human validation

MACHINE LEARNING & CLOUD

TensorFlow · Azure ML · MLflow · Docker · AWS · GitHub Actions

SOFTWARE QUALITY

Git · Unit testing · Validation workflows · Technical documentation · CI/CD

LANGUAGES

Dutch (native) · English (C1) · French (B1–B2)

Driving licence B · Hospitality work since 2021
